INDEX – Newsletters & Journals. v26

A reasonably up-to-date complete listing of all known contents of all known VZ publications.

Index for all newsletters and journals for VZ-200, VZ-300, Laser210, Laser310, Texet TX8000 and Selorian Fellow

Compiled by Dave Maunder. (dave.maunder@gmail.com) Last updated: 18/March/2009

INDEX:	Adlib Vee Zed	Gordon Browell	
	Micro Magic		
	Archi VZ	Leslie Milburn	#1 to #4. Missing #4
	Christchurch User Group newsletter		
	DSE Comput		
	Hunter Valley VZ Users Group (HVVZUG)	Gavin Williamson / Joe Leon	#1 to #44.
	VZ200 Interface	Tim Hartnell	
	Le Vz OOP	John D'Alton	.#1 to #27. (some missing)
	Lysco	Leon Young	
	OUTWEST	Rick Swancott	
	Studio Adlib		
	VDU		
	Vee Zee news	John Waters	
	VZCOMPU200/300	Michael Novakovic	#1 to #4. Dec 85 – Apr 86.
	VZ Link	Peter Hill	#1 to #75
	VZ200 Newsletter	Guy Thomson	
	VZ Down Under	Harry huggins	#1 to ?
	VZ User		
	WAVZ		
	XILOG		
	Output/VDU	Luigi Chiodo	
	VZ Diskmag	Jason Oakley	#1 to #4

Magazine article and program listing index.

Archi VZ was a 4 piece compilation by Leslie Milburn.

Comput was a quarterly newsletter put out by Dick Smith Electronics containing facets of all computer systems that were being sold by the company at the time.

Interface was newsletter put together by Dick Smith Electronics especially for the VZ computers, and was distributed throughout their nation-wide stores.

The Hunter Valley VZ User Group was one of the longest running VZ groups, starting off in the early years as a newsletter by Gavin Williamson and continuing on for another six years into a journal by Joe Leon.

INTERFACE (1983) – Tim Hartnell.

When you originally bought the VZ200 computer from Dick Smith, inside the box was a card which you sent away to join up with the official user group. This is the newsletter you received which was edited by Tim Hartnell. Only a total of three issues were produced.

Issue #1 Issue #2 Issue #3

Comput - Dick Smith Electronics (1984 - 1986)

This publication was not just for the VZ machines but also catered for other machines being sold by Dick Smith at that time, such as the Challenger, Bondwell and Cat computers. These were not sent out as with Interface, you had to go into a store to get them - but they were free.

Issue 1 for Australia was released in August 1984 with issue 1 for New Zealand being released in June 1985. I have got five Australian issues but only the first New Zealand issue. I would love to know how many were produced in total and if there were any further issues unique to New Zealand.

Issue 1 (Australia) Issue 1 (New Zealand) Issue 2

Issue 3 Issue 4 Issue 5

Visual Display Unit (1984)

This newsletter was produced by Luigi Chiodo. I think only four issues were produced. Unfortunately I have misplaced the first three issues. Can anyone who has a copy of them please contact me.

Issue 4

Ve Zee News (1984 - 1985)

This newsletter was produced by John Waters. The first issue was produced in July 1984 and the last in June 1985. There were a total 12 issues and the contents were of good technical quality. Thanks goes to Dave Boyce who supplied the missing issues all those years ago.

Issue 1 Issue 2 Issue 3 Issue 4

Issue 5 Issue 6 Issue 7 Issue 8

Issue 9 Issue 10 Issue 11 Issue 12

Lysco (1984 - 1986)

This group was run by Leon Young and run until July 1986. I do not know how many newsletters and price lists were produced. A sample newsletter was sent to a limited number of people in October 1984 with the first mainstream newsletter being produced in November 1984. If you have any issues not listed below, pleae contact me..

November 1984 February/March 1985 July/August 1985 July 1986

Out West VZ200 Users Group (1984 ??)

This group was run by Rick Swancott. According to my own records there were only two issues, but I do not know for sure.

Issue 1 Issue 2

Ad Lib Vee Zed Micro Club (1985 - 1986)

This group was run by Gordon Browell. I have got all six issues of Micro Magic and all six issues of plus the accompanying Studio Ad Lib Workshop. In correspondence I had with Gordon he hinted that after the series was finished he would continue with a newsletter, but I never received one and can find no evidence that he continued on. Do you know ?.

Welcome Letter Sample Newsletter

Micro Magic:	Issue 1	Issue 2	Issue 3	Issue 4	Issue 5	Issue 6
Studi Ad Lib:	Issue 1	Issue 2	Issue 3	Issue 4	Issue 5	Issue 6

VZ COMPU 200/300 (1985 - 1986)

This group was run by Michael Novakovic. I have got the first four issues plus the two page Machine Language flyer, but I get the feeling that there was at least one more issue. Hopefully someone will be able to let us know.

Issue 1 Issue 2 Issue 3 Issue 4

WAVZ User Group (1987)

This was a sample newsletter produced by the WA VZ Usergroup. I am unsure how many issues, if any, were produced.

Issue 1

ArchiVZ (1994 - 1995)

By the beginning of the 1990's most of the Australian Users Groups were closing down. Leslie Milburn produced a **free** publication to try and rally people to take more interest by providing a central point of contact for all VZ200/300 resources. Three issues of this publication were produced plus a Quick Reference Card which proved to be very popular at the time.

- **Hunter Valley VZ Journal** aka Hunter Valley VZ Users' Group Newsletter aka Hunter Valley VZ Users' Group Magazine - published by the HVVZUG (Hunter Valley VZ Users' Group), mostly by Joe Leon
- **LE'VZ 200/300 OOP** (Owners, Operators and Programmers) aka LE'VZ - published by John D'Alton (the computer section of his website can be found here)
- **The Vee Zedder** - published by Leon Young of Bunbury, Western Australia
- **Vee Zee News** - published by John Waters of Cheltenham, South Australia

- **VZDU** - published by Vee Zed Down Under Club
- **VZ200 Interface** aka Interface - published by Tim Hartnell
- **VZ Link** - published by Peter Hill
- **VZ User** - published by Mark Harwood

- **Glass teletype using the VZ200 (2 parts)** (VZ200 RTTY) - This project allowed VZ200 users to enter the world of RTTY. Only useful if you had a radio amateur licence and equipment. ETI project 756 described in ETI November 1984 p106-112 & ETI December 1984 p93-97 (note errata on p95). DSE K-6318 $69.50.

- **VZ Serial Interface** (VZ200 Terminal) - This project provided a 300-baud serial interface with full or half duplex operation. Allowed connection of a modem to the VZ computer. ETI project 695 described in ETI August 1985 p72-8. Reprinted in ETI Saturday Arvo Projects p4-9. DSE K-6317 $49.95.

- **RTTY using the VZ200 Computer** - by Lloyd Butler. Described in Amateur Radio September 1985 p10-11. This project was started before the DSE kit was released. The article gives details of the hardware but only a description of the software. The original program was written in PLM, a high level language designed by Intel for the 8080/8085, and which produced Z80 compatible code. Unpublished was the actual decoder circuit Lloyd used which was a fairly complex filter type circuit, as opposed to the published design which used a PLL IC (XR2211) for simplicity. Lloyd was kind enough to send me a copy of this original circuit.

- **Super II VZ200 Modification** (VZ200 Update) - by Matthew Sorrell. ETI project 687 described in ETI July 1986 p55. Note erratum for this project.

- **An "ultra-graphics" adaptor for the VZ200/300 computers** - by Matthew Sorrell. AEM project Project 4512 described in AEM April 1988 p57-63. An ambitious project which offered 256 new characters, an additional 6K of video RAM plus 2K extra RAM, and a number of new higher resolution graphics modes. Requires extensive modification of the

VZ-200/300 and should not be undertaken lightly. (Note errata in AEM June 1988 p7 and AEM July 1988 p7.)

- **Memory Expansion for the VZ200/300 computers** - by Lloyd Butler. Described in Amateur Radio April 1988 p11-15. This project added 18K to the VZ300 and 20K to the VZ200.
- **VZ300 Eprom Programmer** - ETI project 1611 described in ETI May 1988.
- **VZ300 Data Logger** - ETI project 1612 described in ETI July 1988.

- **BASIC Reference Manual** (Video Technology Ltd - free with VZ200/300) - an introduction to the computer and to BASIC programming
- **First Book of Programs** (DSE B-7202 $6.95) - BASIC programs written by Wayne G Richmond (of Cosmic Software: Metric Spycatcher & Flashword Series)
- **Further Programming** (DSE B-7208 $9.95) - written by Tim Hartnell, this book features more advanced BASIC programming including MODE 1 graphics, music, PEEKs and POKEs
- **Getting Started** (DSE B-7206 $9.95) - A basic and BASIC introduction to the VZ200
- **Introduction to Computing** (DSE B-7200 $9.95) - really an introduction to BASIC programming by Toni Louise Henson
- **Programming the VZ300** (DSE X-7325 $14.95) - written by Tim Hartnell, this is a broad introduction to programming in BASIC that even touches on saving your programs to cassette or disk
- **Second Book of Programs** (DSE B-7203 $6.95) - a variety of program authors contributed to this one. Seems to contain a number of programs also released on tape (eg Attack of the Killer Tomatoes, Poker Machine and others). Includes a number of programs to use with the plotter Dick Smith released, and a renumber subroutine that uses POKEs and PEEKs.
- **The Amazing VZ300 Omnibus** (DSE X-7327 $19.95)
- **The Giant Book of VZ200 Games** (DSE B-7210 $9.95)
- **The Giant Book of Games for the VZ300** (DSE X-7326 $19.95)
- **VProgrammeZ-VHintZ-VHardwareZ** (VSoftwareZ $18.50) - a special book of programme listings, BASIC and machine code, hardware modifications and more
- **VZ200 Technical Reference Manual** (DSE B-7204 $9.50) - written and compiled by Jamieson Rowe (formerly and latterly editor of Electronics Australia, but at the time working for Dick Smith Electronics as a 'technical guru') this 1983 release provides a comprehensive guide to the VZ200 hardware, including circuit diagrams, and an introduction to the more important ROM subroutines.
- **VZ200/300 Assembly Language Programming Manual for Beginners** (Steve R Olney $25.00) - a self-published work by Steve Olney that aims to introduce the reader to machine code programming for the VZ200/300.
- **VZ300 Technical Manual** (DSE X-7324 $14.95) - an update of the VZ200 Technical Reference manual. New chapters feature joysticks, disk controller and disk drive, as well as the disk operating system.

Electronics Australia

- **New low-cost computer has colour graphics, sound effects** - (article) June 1983 p137
- **The VZ-200: colour graphics and sound** - (review) Peter Vernon: July 1983 p130-133
- **Buying your first computer** - (article) Peter Vernon: June 1984 p12-19 This article has a picture of the VZ200 and a number of references. In the same issue of EA, Dick Smith Electronics advertised a VZ200 bundle consisting of the VZ200 computer, VZ200 datasette, 16K RAM expansion module, 'Introduction to Computing' book and any 6 software tapes (excluding Learjet and Air Traffic Controller) for $299 - a saving of just over $100. Note that by this point in time the VZ200 was priced at $169.
- **An important role for 'useless' small computers** - (article) Neville Williams: August 1984 p30-33
- **Improved graphics for the VZ200 computer** - (mod) P Dimond: August 1984 p65
- **This was written on a 'useless' computer** - (article) Neville Williams: November 1984 p78-80
- **Advice on buying a personal computer** - (letter & response) December 1984 p123
- **Word Processing on the new VZ300** - (article) Neville Williams: August 1985 p22-27
- **Computer drive for the EA EPROM Programmer** - (mod) Rick Buhre in Circuit & Design Ideas: January 1987 p60 This describes a modification to the free-standing EPROM programmer that enables it to be driven from a Centronics printer port. A program listing for the VZ200/300 is mentioned but not published.
- **From Wireless to Electronics** - (article) Neville Williams: January 1988 p42-47 This article mentions the VZ200 and VZ300 on pages 46 and 47 with particular reference to the low pricing.
- **VZ-300 expansion problem** - (letter and response) Information centre: January 1988 p174

Your Computer

- **Decoy** - (program) Rowe: March 1985 p105-9
- **Painter** - (program) Daniel: April 1985 p160
- **Number Sequence** - (program) Thompson: May 1985 p106
- **Morse Tutor** - (program) Heath: June 1985 p70
- **Electric Tunnel** - (program) Daniel: July 1985 p81
- **Number Slide** - (program) Daniel: August 1985 p114
- **Yahtzee** - (program) Thompson: October 1985 p105-107
- **Sorting Out the Sorts** - Jankowski: October 1985 p107-108

- **16K Memory Module** - DSE X-7205 $79.00 - also called 16K Expansion Module
- **16K Memory** (for VZ300) - DSE X-7306 $84.50 - similar to the VZ200 16K memory module but with different address mapping

- **Datasette** (not VZ branded) - DSE X-7206 $39.95 - this was released some time after the original datasette (it was the one I (Andrew Laird) purchased with my original VZ200 purchase) and was promoted for use with the VZ200
- **David Newcombe's 18K RAM Pack** - for VZ300 $70.00 (approx)
- **David Newcombe's 64K ROM Pack** - $55.00 (approx) Memory mapped to cartridge area. Included a menu on EPROM. Commonly used programs could be burnt to EPROM and loaded instantly.
- **David Newcombe's Buffer Board** - $60.75 (approx) Allows additional devices to be plugged into the VZ computer. Buffered address, data and some signal lines. Protected Z80 from experimentation damage.

NOTE: it is not clear whether David's products were just prototypes or whether he actually went on to produce and sell these items.

- **Disk Controller** - DSE X-7304 $89.00 - contained DOS and the interface circuitry for the disk drive. Has a piggyback slot for the RAM expansion.
- **Disk Drive** - DSE X-7302 $299.00 - the ultimate VZ peripheral
- **Joysticks** - DSE X-7212 $39.50
- **Printer Interface** - DSE X-7210 $49.50
- **Printer Plotter** - DSE X-7210 $299.00 - the original ones were Laser branded
- **VZ200 Datasette** - DSE X-7207 $69.50
- **VZ300 Datasette** - DSE X-7310 $69.50 - identical to the VZ200 Datasette apart from labelling
- **VZ300 Joysticks** - DSE X-7315 $49.50 - identical to the earlier joysticks

- **25 Exciting Games** on one cassette - Lee Tait $20.00
- **3D-Maze** Laserlink $10.00
- **Adventure Island** - LYSCo
- **Air Traffic Controller** - DSE X-7249 $19.95 (also distributed by VSoftwareZ D/TG42 $20.00 and Laserlink $20.00)
- **Alien Escape** - LYSCo
- **Alien Rain** - LYSCo
- **Antarctic Challenge** - S Molloy $15.00 on disk, $12.00 on cassette
- **Array/Restore** - VSoftwareZ TU11 $14.95
- **Art Gallery** - Laserlink $20.00
- **Asteroid Field** - LYSCo
- **Asteroids** - DSE X-7248 $12.50
- **Backgammon** - DSE X-7273 $14.95

- **Beam Heading** - see Radioman Pack
- **Beat the Bus** - LYSCo
- **Biorhythm/Pair Matching/Calendar** - DSE X-7237 $12.50
- **Blackjack** - DSE X-7235 $12.50
- **Blackjack** - VSoftwareZ D/TG36 $20.00
- **Block 1** - VSoftwareZ D/TG51 $15.00
- **Block Puzzler** - Laserlink $10.00, VSoftwareZ D/TE7 $10.00
- **Bust Out** - Laserlink $20.00
